## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. Claims 4 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is indefinite because it is unclear as to which parent claim it is depended on.

In claim 17 the recitation "the additional steps of heat treating the adiabatically coalesced material and returning the adiabatically coalesced material to the mold" in lines 1-3 implies that the coalesced material has been removed from the mold for heat treating. Note that implied limitation is improper.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1742

3. Claim 18 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,202,757.

Although the conflicting claims are not identical, they are not patentably distinct from each other because every limitations in the process steps are covered in the claim of the patent.

4. claim 1-3, 5-16 are allowable over the cited prior art because none of the prior art teaches or suggestion a process of forming an article by placing a tool in a mold filled with a material that extends from the mold and striking the tool with a striking unit with adequate force to adiabatically coalesce the material.
